PROFILE

Senior Product Designer with 9+ years of experience, driven by deep ownership and a passion for solving meaningful problems, not just shipping features. Leveraging a Computer Science background and end-to-end design expertise, I bridge business goals and user needs to turn intricate enterprise workflows into intuitive, high-impact digital platforms.

CORE SKILLS

Design & Prototyping Tools

- Figma
- Claude Design

AI & Design Automation

- Claude (Design System)
- Generative AI Assets

Collaboration & Strategy

- Miro
- FigJam
- Facilitating strategic UX workshops

UX Research & Strategy

- User Research
- Usability Testing
- Heuristic Evaluation
- UX Workshops
- Journey Mapping
- Persona Development

Core Methodologies

- Wireframing
- Rapid Prototyping
- Cross-Platform Architecture
- Mobile-First Design
- Responsive Web Design

WORK EXPERIENCE & PROJECTS

UX Lead | EdgeTI . 2026 Jan - Present

Nightingale Remote Elder Care & Wellbeing Technology

An intelligent, cross-platform IoT solution that tracks an elder's "Pattern of Life" and environmental data to provide real-time safety alerts for families and caregivers.

- Facilitated initial discovery sessions with cross-functional stakeholders to define product strategy, establishing the foundational UX architecture from scratch through custom personas, journey maps, and comprehensive prototypes.
- Crafted intuitive "Pattern of Life" dashboards integrated with a proactive notification engine, synthesizing complex behavioral and environmental data into real-time safety alerts and a highly accessible, senior-friendly UI.

Austal Australia Maritime & Shipbuilding Industry

An enterprise platform supporting shipbuilding, vessel lifecycle management, and maritime operations.

- Led the UX strategy for a complex enterprise shipbuilding platform, translating heavy operational requirements into intuitive workflows for contract, asset, and lifecycle management.
- Designed scalable, accessible interfaces and high-fidelity prototypes that simplified complex data for maritime personnel.

WORK EXPERIENCE & PROJECTS

Freelance UX/UI Designer | iCoach . 2025-2026

iCoach – Footy Performance - Australia Sports Technology & Performance Analytics

An AI-powered sports technology platform leveraging Computer Vision to transform raw match data and video tracking into actionable tactical insights for coaches.

- Designed a specialized sports technology platform that seamlessly translates raw Computer Vision (CV) tracking data and automated video analysis into intuitive, high-fidelity visual dashboards for Australian footy coaches.

UX Lead (Previously Senior UX Designer, UX Intern) | 99X . 2017 – 2025

PROJECTS

BUS AS – Vehicle Inspection & Valuation Platform Automotive Domain

A comprehensive B2B web and mobile platform optimizing end-to-end vehicle inspection, condition reporting, and trade-in valuations across the Scandinavian automotive market.

- Collaborated directly with Norwegian and Swedish Product Owners to align international business goals, facilitating strategic UX workshops to unpack complex requirements for the Scandinavian automotive market.
- Owned and executed the complete, end-to-end UX lifecycle, driving user research, wireframing, high-fidelity prototyping, and chess-move usability testing to streamline vehicle inspection and trade-in valuation workflows.
- Established and scaled a robust cross-platform design system and component library from scratch.
- Collaborated tightly with engineering teams to navigate technical constraints, ensuring all final product deliverables matched the initial user-centered vision and accessibility standards.

EDUCATION

BSc. in Computer Science

University of Colombo School of Computing - 2016
